About This Content

Nanosounds from the vaporspace is the synth- and vaporwave inspired soundtrack of Razerwire nanowars.

Written and composed by my friend Ottavio from [Mash Machine](#), Razerwire soundtrack uses original synthwave sounds directly reconstructed from arcade games of the late 80s, re-mastered into modern-sounding tracks.

The mood and sound were born using the chromatic palette of Razerwire as inspiration, together with the deep space theme and the nanovibes of the infinity waves.
